Dear all,

The Committee is mainly in charge of commissioning the ALISE Research Grant proposal review and decide on a winner (or winners). This involve the Chair disseminating "call for proposals" messages to various listservs to solicit proposals. Then coordinates the review process. Last year we had 7 submissions and I first asked the Committee members to indicate whether there is a conflict of interest, and then each Committee members reviewed three proposals within less than a month tim frame, and then based on the numerical scoring, there were three finalists, and all Committee members voted and ranked on the three finalists. As a result, the winner was selected.

I will be happy to share last year's Committee Report to all committee members if Prof Bouthillier and others are interested. The report shoul give people some idea of the workload and duties.

Looking forward to working on the Committee again this year!

Rong
